% comment       abc xyz
xyz
```

```
abc             abc
<tab>quote          quote
xyz             xyz
```

```
- item          •  item
- item          •  item
  - sub item       •  sub item
```

```
+ item          1. item
+ item          2. item
+ item          3. item
```

```
: term          term
definition          definition
: term          term
definition          definition
```

```
```
verbatim   verbatim
  block   **block**
```
```

`|| tit 1	tit 2 |`		
`| c1	c2 |`	**tit 1**	**tit 2**
`| c3	c4 ||`	c1	c2
`|    c5 + c6  ||`	c3	c4
	c5 + c6	

OPTIONS

-t,	--target=TYPE	html, xhtml, sgml, tex, lout, man, mgp, moin, pm6, txt
-i,	--infile=FILE	Input file ("-" for STDIN)
-o,	--outfile=FILE	Output file ("-" for STDOUT)
-H,	--no-headers	No header, title nor footer
	--encoding=ENC	Encoding: utf-8, iso-8859-1, etc
	--style=FILE	HTML CSS file
	--css-sugar	Insert DIV tags for CSS
	--css-inside	Insert CSS inside output file
	--toc	Add Table of Contents (TOC)
	--toc-level=N	Set maximum TOC level
	--toc-only	Show TOC
-n,	--enum-title	Enumerate all titles
	--mask-email	Hide emails from spam robots
-C,	--config-file=FILE	Read config from external file
	--dump-config	Show input file config
-V,	--version	Show program version
	--no-OPTION	Turn OFF this option

MACROS

%%Date %%Mtime	The conversion date / modification time Default: %Y%m%d %Y (year) %m (month) %d (day) %H (hour) %M (min) %S (sec) %c (full) %A %a (weekday) %B %b (month name) `%%date(%Y-%m-%d %H:%M)`
%%Infile %%Outfile	The input/output file path Default: %f %f (file) %e (ext) %d (dir) %p (path) %F (file w/o ext) %D (parent dir) `%%outfile(%D :: %F :: %e)`
%%TOC	User specified TOC location `%%toc`

SETTINGS

%!Target	Same as --target `%!target: html`
%!Encoding	Same as --encoding `%!encoding: iso-8859-1`
%!Style	Same as --style `%!style: abc.css`
%!Options	Default command line options `%!options: -n --toc`
%!PreProc	Input search & replace filter `%!preproc: JJS "John J Smith"`
%!PostProc	Output search & replace filter `%!postproc(html): @@  `
%!IncludeConf	Same as --config-file `%!includeconf: myconfig.t2t`

INCLUDE

%!Include: F	Include file F as txt2tags file
%!Include: ``F``	Include file F as verbatim block
%!Include: ""F""	Include file F as raw block

OTHER

Headers	First 3 lines
Config	Comments after Headers
Body	From first text line to the end
RC config file	~/.txt2tagsrc (unix, mac), _t2trc (win)
Anchor	=title=[anchor] ... [link #anchor]

SAMPLE INPUT FILE

```
Lord Of The Rings
J. R. R. Tolkien
Last Update: %%mtime(%c)

%!target: html
%!options(html): --css-sugar --style lotr.css

They walked, they fought, they won. **Hooray!**
```
